

Chris Lambe

Operations Director

Strategy & Assurance Hand Back Specialist

Experience

Over 15 years of Railway construction and assurance experience, across several sectors. Ranging from Track Drainage, Traction Power Sub-Stations, Multi Discipline Station Refurbishments and High Complexity Station Redevelopment Projects.

My roles have taken me from the construction site interface as a Package Manager, getting suppliers ready for start of works and following through to assurance close out. As the Site Manager on Traction Substations, I was tasked with the safe delivery of works with existing substations and delivering the works programme for asset removal/commissioning of Asset through to QICC part 9.

As the NR Consultant Programme Manager for **London Bridge Station Redevelopment** – I had a multidisciplinary delivery team of over 35 direct staff, including Project Managers/Engineers and Section Engineers and supply chain, to manage the scope identification, delivery readiness/close out of works & assurance within the operational station.

Co-founder of **DSE** since 2019, specialising in assurance strategies to meet the Stakeholders requirements from project set up to enable progressive assurance hand back throughout the Project lifecycle.
