Dylan Pemberton

Technical Assurance Author

Technical Author

Experience

Recently have graduated from the University of Leeds with a First Class Honours in Philosophy, Psychology and Scientific Thought, now working with DSE, embedding in the assurance model with the delivery teams, in order to successfully achieve staged maintenance hand back/hand over to the client maintainer for the Gatwick Station Project. This project will help to showcase the adaptability of Dylan's skills fullfeeling .

Using skills gained from his university experience of authoring numerous reports for module specific course work as well as his dissertation, he was first tasked with reviewing DSE existing Asset Management Pack template. DSE wanted to broaden this template which was based on NR Engineering Standards 089, to a broader industry wide document. Following the reviewing of existing document and discussing what was required for a new template/ report from the wider DSE team, it was agreed that the new document would be the Discipline Completion Pack (DCP).

Dylan has authored 62 Discipline Completion Packs for Gatwick Station Project (GSP) and populated the content of the DCP for the Civils and Structural package for the BoH Staff Accommodation Block, which was accepted first time by the Client Head of Assets.
