Delivery Director

Strategy & Assurance Entry Into  
Service Specialist

## Experience

Civil Engineer and MBA graduated, with over 16 years' experience in project management of rail infrastructure projects in the UK.

Assessment Engineer of civil and structural assets within the London Underground Bridges & Structures Team.

NR Scheme PM for various projects, including the successful installation of the new conductor beam (first time this product was used in the UK) in 2014 following the removal of the existing OLE wire at Kings Cross station; this was part of the construction of the new station switch room, station switches and HV cabling. Responsible for day-to-day planning and managing of site works during possessions, liaising with the main designer and the delivery team on site. Preparing and presenting the T-0 (Go/No Go) meetings for possessions to Network Rail Director and Programme Directors.

NR EIS PM, supporting the hand back process of the **London Bridge Station Redevelopment**, including the preparation and implementation of the hand back readiness programme, covering the AMP process, 60K OPAS asset management system, and maintenance requirements. Project achieved Station Maintenance transfer of all assets from the Project to the Maintainers.

Co-Founder of **DSE**, delivering projects since 2019.
